

Serving Government and Military Programs in the Developing World

Bukkehave™

The Bukkehave team is your partner for fleet solutions in emerging markets

What does Bukkehave offer to government and military projects in the developing world?

Bukkehave is a government and military service provider for programs and task orders in emerging markets and post conflict countries. We have extensive international expertise and over 85 years of experience working in remote, hazardous and harsh environments. We combine our vast capabilities for supplying vehicles, trucks and heavy equipment with our ability to offer maintenance workshops, spare parts inventory and training. We offer a full service logistics package. Whether you ship via air, sea or ground, our logistics team will handle the delivery. Bukkehave partners with our clients to ensure the highest level of service, satisfaction and accountability in the delivery of products and services to mission critical programs.

What are some of the challenges government and military operations encounter when providing fleet solutions in the developing world?

Bukkehave's core business is tailoring the right solution for any given project or task order. We carefully consider the destination country's weather conditions and terrain, standard fuel quality and local support to deliver an optimal solution. We supply a first class line up of vehicles and trucks, manufactured to handle the harshest terrain, and stand behind our products with a warranty. Our strong dealer relationships with Mitsubishi, Toyota, ACMAT, Renault, Mercedes, Iveco and Isuzu, to name a few, have resulted in many tangible benefits to our clients. We also support the "Buy American Act" through our relationship with US manufacturers. Bukkehave is an authorized supplier of Chrysler, Jeep, Dodge, Blue Bird Buses, MACK Trucks, JCB Equipment, Manitowoc Cranes and many others. We special-order these vehicles and trucks to be manufactured in accordance with the emissions and registration requirements of the destination country. Bukkehave's goal is to provide the best solution based on your needs, your deadline and your budget.

Government, military & prime contractors

What do we offer?

Vehicle fleet solutions

Where do we operate?

Emerging markets

When is the best time?

Right now

Why do we do all this?

We have the knowledge, desire, experience, capability and resources

Serving Government and Military Programs in the Developing World

Who are some of the organizations Bukkehave serves in government and military projects?

Whether supplying a fleet of 420 police vehicles to support the **CIVPOL** program in Lebanon or delivering heavy equipment to build camps and refurbish airports for **LOGCAP**, Bukkehave is there to serve. We provided project management and delivered ambulances, vehicles, pick-up trucks, heavy equipment, refurbished NATO equipment and spare parts to support the **UN** program in Sudan. The military awarded Bukkehave a contract to supply 300 Toyota Police vehicles, 63 JCB Forklifts and training to support the Afghanistan/Iraqi Supplemental Acquisition Program (**AISAP**). We have provided equipment and services to enhance African countries' ability to conduct peacekeeping operations and build their capabilities for crisis management and counterterrorism through the **AFRICAP** and **AFRICOM** programs. We have been very active in supplying and delivering armored vehicles to government embassies all over the globe including the US, UK, Canada, Denmark, Norway, and Italy, as well as International NGOs and commercial enterprises.

In what phase of a project does Bukkehave offer the best service?

Involving Bukkehave at the pre-solicitation stage of a project is the most beneficial to our clients. We can recommend and provide guidelines to what type of trucks and equipment is best suited for the country of deployment. Please give us a call to discuss your project needs. We guarantee assistance in the most efficient, timely and professional manner.
